To help attract new talent to these career paths, the Buick Achievers Scholarship Program – funded by the General Motors Foundation – will award 50 renewable scholarships of up to $25,000 per year to recipients pursuing careers in the areas of STEM, information technology and other fields related to the automotive industry.

Application Deadline: FEBRUARY 27, 2015 5pm

Angel Maredia - “The Buick Achievers Program made it possible for me to attend my dream school. This program, quite simply, changed my life.”

Studying computer engineering at Columbia University, Angel mentors an elementary and middle school robotics team, working at RoboCamp with 480 students ranging from second to eighth grade. She also volunteers as a piano teacher for a young girl with leukemia. With her degree, she intends to enter the automotive industry to innovate new, cutting-edge technology that will help change the face of how we view microprocessors.
