

# UNDERGRADUATE SCIENCE RESEARCH AT COLUMBIA

**A Two-Part Workshop Series for Undergraduates**

Interested in getting involved in research, but don't know where to start or what you might like to do? This two-part mini-series of workshops aims to facilitate first-years' and sophomores' involvement in science and engineering research at CU.

## **PART I: What is Science Research?**

Part I will focus on what science research is and can potentially be for an undergraduate, the diversity of current science research at Columbia, the broad academic and personal benefits of research experience, and individual student perspectives on research. The workshop will include a panel discussion featuring research-active Columbia College and SEAS juniors and seniors. Join us:

**Friday, Sept. 26<sup>th</sup> 1:00 PM,  
401 Lerner Hall**

**Brought to you by the Center for Student Advising and the  
Columbia Undergraduate Research Journal**
