From the Coordinators

Hello New Students,

Welcome to Columbia University! We are excited to introduce you to our incredible community that spans four undergraduate schools and a city of eight million people. We hope that you have an excellent start to what will be a groundbreaking year. In the following pages, you will find all the information you need about the New Student Orientation Program (NSOP). This will be a fun-filled and eventful week!

We, the NSOP Committee, are composed of students from the four undergraduate schools: Barnard College (BC), Columbia College (CC), the School of General Studies (GS), and The Fu Foundation School of Engineering and Applied Science (SEAS). We have spent the entire summer creating programs to introduce you to life on campus and the greater New York City area. Following this year’s theme, “Infinite Possibilities,” we have planned programs with great thought to help you access information, meet faculty and administrators, and receive various resources to guide you through your college career.

This year’s NSOP theme speaks to the adventurous, imaginative, and inquisitive nature of our incoming students. NSOP serves to assist students to gravitate to a stable place in their new home. You may at first feel ungrounded, as if launched into outer space. NSOP 2013: Infinite Possibilities will guide you to embrace the concept that taking one small step leads to much larger ones. We hope students will follow the precedent set by the greatest astronomers who challenged commonly accepted ideas for the sake of scientific advancement.

During your time here you will pursue your dreams and share your passion for learning with the rest of our richly diverse community here in Morningside Heights. It is home to students of all ages, races, ethnicities, nationalities, creeds, sexual orientations, gender identities, abilities, and religions, who all share the same desire to reach the outermost limit both inside and outside the classroom. There will be countless opportunities for you to explore and travel throughout the city.

We trust that you will make the most of the resources available to you during this upcoming week. Please make sure to read through this schedule book and download our NSOP Guidebook App to highlight mandatory events, as well as those that interest you! Some of the biggest events of the week include Community Forum, an introduction to the Columbia community; Performance Showcase, your first opportunity to see the myriad of artistic talents on campus; and the New York City Event, a social event that will offer a taste of what this amazing city has to offer.

Over the next eight days, you will meet and get to know your fellow new and returning students. An Orientation Leader (OL) will guide your orientation group, and Crew Chiefs (CCs) will coordinate events during the week. The OLs, CCs, and Committee members are available to you at all times. Please do not hesitate to approach us with any questions that you may have. (We will be in our colorful shirts). NSOP is the beginning of your journey within the Columbia community, so be sure to enjoy it!

Sincerely,

Jade Bonacolta, BC’15

Community Principles

PREAMBLE
Developed by undergraduate students and staff in Barnard College, Columbia College, The Fu Foundation School of Engineering and Applied Science and The School of General Studies, these principles serve as a framework to facilitate ongoing conversation for how we interact with one another. They are not meant to be additional rules of conduct; rather, they are a means through which we hold ourselves, and others accountable. Every member of the community has a role in sustaining a safe, caring, and accepting environment in which these principles can thrive. However, individuals will not be brought through any disciplinary process due to a “violation” of these principles.

COMMUNITY PRINCIPLES STATEMENT
Columbia University is a community of students, faculty, alumni, staff, and visitors. As members of this community we understand that our actions as individuals impact not only our own lives but also those of our community. Through these principles we can continually engage each other in order to understand our differences and similarities. We believe that intellectual discourse in all forms is essential to the University; as such it is vital that we give all perspectives a place to be expressed. We are all responsible for this community and affirm that we treat each other with respect and dignity. Members of our community act with honesty by accepting accountability for their words and actions and maintaining the integrity of the community as a whole. As members of the University with different experiences and ideas, we actively engage each other to understand, appreciate and accept our various identities. We participate in a free and open community and ask that all those who come within our gates act in accordance with these principles.
Disability and Accessibility Information

Disability Services (DS) facilitates equal access for students with disabilities by coordinating reasonable accommodations and support services. Reasonable accommodations are adjustments to policy, practice, and programs that provide equal access for students with disabilities. Examples include the administration of exams, services such as note taking, sign language interpreters, assistive technology, and coordination of accessible housing needs. Accommodation plans and services are custom designed to match the disability-related needs of each student and are determined according to documented needs and the student’s program requirements. Registration includes submission of both the Application for Accommodations and Services and disability documentation. The application and disability documentation guidelines are available online and at the DS office. Students are encouraged to register within the first two weeks of the semester to ensure that reasonable accommodations can be made for that term. Please note that students are not eligible to receive reasonable accommodations until the registration process is complete.

TRANSPORTATION AND ACCESS FOR STUDENTS WITH DISABILITIES
Although the MTA is gradually adding elevators in various subway stations, the subways are generally not wheelchair accessible. If you are unable to navigate stairs (mobility impairment, chronic illness, etc.), the best option is surface transit, as all New York buses are lift-equipped. Another option, though more expensive, is a taxi or car service. The MTA has an excellent website with complete info regarding accessibility at: www.mta.info/accessibility/.

Safety and security are foremost concerns on college campuses and in New York City. There are many resources on campus to help you stay safe and to assist you in emergency situations; some numbers can be found on the back of your Columbia ID.
